ORDER CODES:

- SMS1002 • SLUSH MACHINE SUMMIT I-PRO - DOUBLE BOWL
- SMS1003 • SLUSH MACHINE SUMMIT I-PRO - TRIPLE BOWL

The new bowl shape, thanks to the natural insulation action of the air, maintains the temperature and prevents condensation forming on outer surface; the bowl is also entirely customizable for merchandising actions. In addition to that, the new bowl shape helps a natural mixing process to prevent the ice build-up.

I-Pro is available also in the Mechanical version, that is equipped with traditional rocker switch control board; in this version, machine's settings are only manual and for each bowl it's possible to choose between slush mode and chilling mode.
